Hello Eric,

It was good hearing from you. I was unaware of your interest in collecting bust quarters. Do you have your collection attributed by Brwoning numbers? I am curious about which varieties you have. Any late die state coins with advanced cracks? We are trying to study and record the die states of the quarters for our book. What grades are your coins. We still have some die varieties to photograph for our book.

I knew Jules Reiver well. He was quite a fellow and I'll miss him. He taught me a lot about photography. I visited him and viewed and photographed his quarter collection.

I would love to study your bust quarters if you are in the area. Do you go to coin shows in the southeast? Do you plan to go to FUN show? I would enjoy meeting you sometime.

Glenn

My regards.
 Eric

Dear Glen:
 Our bust quarters are virtually all uncirculated brilliant. I do not go to coin conventions except occasional ANA annuals, as I am rather mature in age. I put my time into numismatic research, writing and collecting.
 The next time I visit my collection at the bank I will see if I have the bust quarter envelopes in a separate area and they would have Browning numbers I think. Otherwise they are in old 10 hole Raymond cardboard holders with sliding plastic covers on each side. I have no images of them.
